

Karachi Institute of Economics and Technology

Course: Artificial Intelligence

Program: BE Software

Faculty: Dr. Husain Parvez

Class ID: 117183

Examination: Assignment-2 (CLO 2)

Date: 2nd May 2025

Total Marks: 10

Due date: 11th May, 2025

1. Write a code to solve Traveling Salesman Problem (TSP) for 100 cities of Pakistan. Use Genetic Algorithm to solve the problem. You can get lat/long locations of different cities, and then compute the aerial distance between cities to get the approximate distance the cities.

You can use generative AI (ChatGPT, Cursor AI, etc) to get hints about your code. Submit the source code and the sequence of cities to be visited after applying TSP solution.
