

COURSE PROGRESS REPORT

Course: Artificial Intelligence

CID: 118820, 118919

Semester: Fall - 2025

Faculty: Muhammad Hussain

Week No.	Contents	Comments
1	Introduction to Artificial Intelligence	Covered
1	Turing Test	Covered
2	Agents, PEAS Model	Covered
2	Rationality, Nature and Properties of Environment	Covered
3	Structure of Agents	Covered
3	Problem Solving by Searching, Uninformed Search Strategies	Covered
4	Breadth First Search (BFS), Uniform Cost Search	Covered
4	Depth First Search (DFS)	Covered
5	Depth Limited Search	Covered
5	Iterative Deepening DFS	Covered
6	Informed Search Strategies	Covered
6	Greedy Best First Search	Covered
7	A* Search	Covered
7	Local Search Algorithms	Not Covered

Week No.	Contents	Comments
8	Genetic Algorithms (GA)	Not Covered
8	Adversarial Search	Not Covered
9	Games, Minimax Algorithm	Not Covered
9	Alpha-Beta Pruning	Not Covered
10	Introduction to Machine Learning	Covered
10	Feature Extraction and Classification	Covered
11	K-Nearest Neighbor (KNN)	Covered
11	Training/Testing Error, Confusion Matrix, Sensitivity & Specificity	Covered
12	Bayesian Networks	Covered
12	Naïve Bayes Model	Not Covered
13	Gaussian Distribution, Covariance Matrix	Not Covered
13	Neural Networks	Not Covered
14	Single Layer Perceptron	Not Covered
14	Non-metric Methods, Decision Trees	Not Covered
15	Entropy, Impurity, CART Algorithm	Not Covered
15	Query Selection	Not Covered
