Paper Type: Subjective

Note: To be solved on A4 Sheet only

Time Allowed: 30 mins

Q1: An online shopping platform classifies customers as High Value (H) or Low Value (L) based on their activity.

The following training data is available:

Customer	No. of Purchase	Time Spent (hours)	Category
A	2	1	L
B	3	2	L
C	6	5	H
D	7	6	H
E	5	4	H

A new customer F has:

- No. of Purchases = 4
- Time Spent = 3
- $K = 3$

Using the K-Nearest Neighbors (KNN) algorithm Predict the category of customer F.
