

Question: Solve the following tree using BFS starting from S to reach G. Fill the trace table below. Also provide the final solution path, time and space complexity.

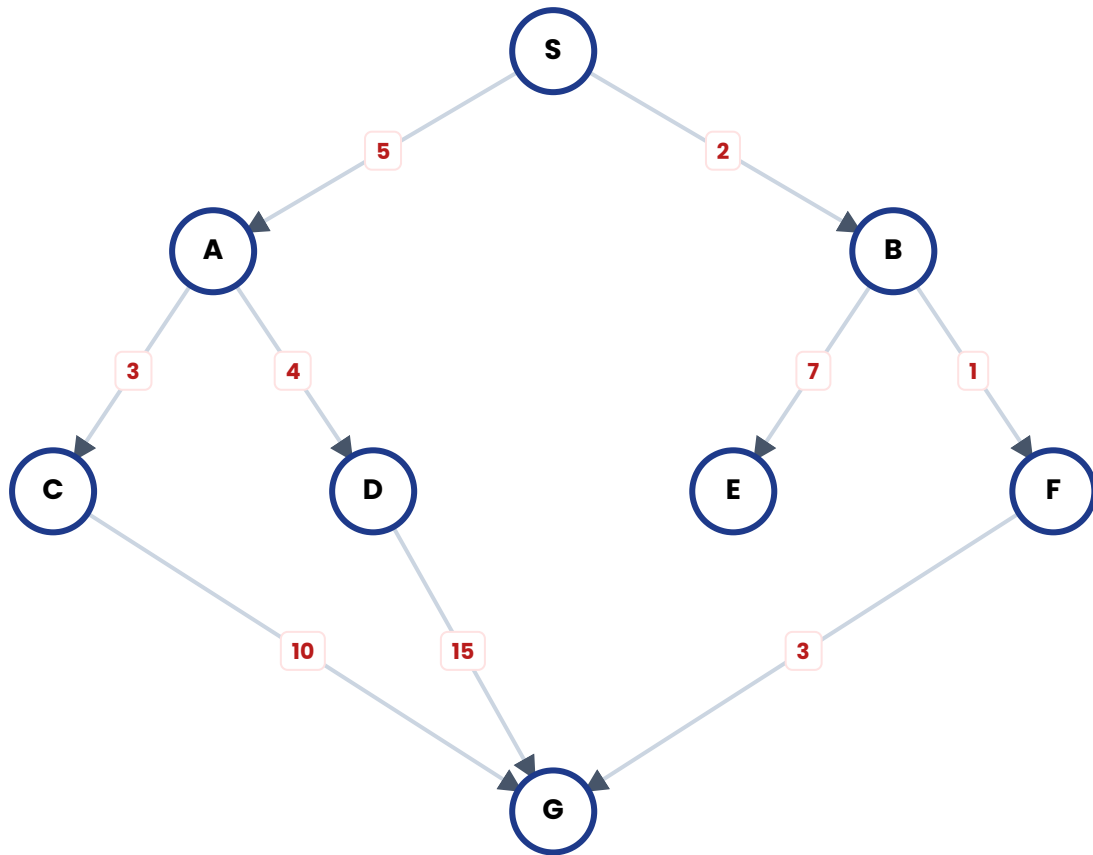

Question: Solve the following tree using DFS starting from S to reach G. Fill the trace table below. Also provide the final solution path, time and space complexity.

Question: Solve the following tree using UCS starting from S to reach G. Fill the trace table below. Also provide the final solution path, time and space complexity.

Question: Solve the following tree using DLS (limit= 2) starting from S to reach G. Fill the trace table below. Also provide the final solution path, time and space complexity.

Question: Solve the following tree using IDS starting from S to reach G. Fill the trace table below. Also provide the final solution path, time and space complexity.
